NATIONAL WEBINAR SERIES -

“AGRIPRENEURS- THE IMPENDING ENTERPRENEURS”

Agriculture today faces many challenges, including globalization and market liberalization, food price crises, natural resource depletion, climate change, rapid urbanization, changing production and consumption patterns, demographic changes, and so on. Many of these directly or indirectly lead to changing markets, and create both opportunities and risks for farmers, especially for smallholders, youth, and women. With a growing recognition of the important role of smallholder agriculture for economic growth and rural development in many countries, market-oriented agriculture appears more prominently on the agenda. Agriprenurship is a key in this regard. Agriprenurship refers to entrepreneurship in agriculture. Entrepreneurship is a concept that encompasses transforming an idea or vision into a “new business or new venture creation, or the expansion of an existing business, by an individual, a team of individuals, or an established business.

In order to motivate the final year outgoing students a series of webinar was organized to encourage the students to Agriprenurship. Idea on financial supports provided to agripreneurs is an important factor. The entire lectures of the series were divided to three:-

1. Lectures from banking officials
2. Lectures from subject matter specialists
3. Lectures and experiences from successful agripreneurs

The lectures of the webinar series were scheduled from July to December 2021 . one lecture was planned for each month.
