Certificate

This is to certify that we have already submitted the purchase details of computers and PD stock register in support of the metric 4.3.2 regarding student-computer ratio. Most of the computer systems in use in the institution are not purchased as such, rather in parts as accessories and then assembled for use by the full-time technician employed in our institution. The availability of a full-time computer technician has facilitated timely reassembling and repair, sparing the need to purchase computer systems as such. Consequently, we are unable to produce the details of bills as required in DVV. However, we have submitted the data on purchase details at hand for your thorough examination.
