Analysis of Students' Feedback on Curriculum

2015-2016

Carmel College has always been keen to look at the pulse of students in every aspect of her journey to actualize the institutional vision and mission. The institution incorporates a holistic and integrated way of assessing their feedback on various aspects of their academic and non-academic activity. As per the data provided by the feedback on the curriculum, about 95.99% of students strongly agree that the syllabus is suitable for the course. The majority of the students are happy about the fact that the syllabus generates interest in the subject area, and around 95.31% of students strongly agree with this statement.

Most of the students are aware of the fact that topics of competitive exams have been included in the syllabus and around 90.15% of them strongly agree with this. About 92.59% of students strongly support the fact that they have obtained research orientation during the programme. Only 0.32% of students disagree with this. The majority of the students (98.06%) strongly agree that a sufficient number of prescribed books and reference materials are available in the library, while 0.04 % disagreed.

About 89.48% of students strongly agree that the curriculum has prospects for higher education and 92.05% strongly agrees on the effectiveness of the present curriculum in providing employment. Around 91.04% of students have felt the present curriculum is effective in boosting the social, economic, scientific, and cultural development of the society.
