

Teachers feed back on curriculum 2021-2022

Analysis of Teachers Feedback on Curriculum 2021-22

With the passage of time, we know that technology is an important element in the teaching -learning process but at the same time we can't deny the fact that teachers play a crucial role in the academic and personal development of the students. Carmel College has pride in her teachers who always lend their selfless support and commitment towards the institution and work for the academic excellence of the students. Teachers' feedback on curriculum is essential in order to ensure quality education to our students. As part of the survey, it was observed that a 4.31 score given by teachers shows that they are satisfied with the syllabi and agree that the syllabus is in line with the development of the discipline.

The opinion on the timely completion of the curriculum obtained a score of 3.84. An average score of 4.51 and 4.39 has been obtained for the prospects of the curriculum for higher education and employability respectively, showing a significant improvement compared to last year.

Majority of our teachers also agree that the college gives the freedom to adopt new strategies in teaching and learning. An average score of 4.52 is given by the teachers to the curriculum for its capacity in ensuring student participation in learning process. Most of the teachers agree that their knowledge of the subject increased due to the updates in the current syllabus. An average score of 4.57 shows that teachers are satisfied with the timely conduct of internal examinations soon after the proper coverage of the syllabus.
